License and Terms of Use

The Transitions Project Open Educational Resources are educational materials that complement the modular curricula developed within the Transitions project under the GA 101056544.

The materials are licensed under the Creative Commons Attribution-ShareAlike 4.0 International license, allowing users to use, remix, and share them, provided that they adhere to the following conditions:

- Attribution: The original creator must be clearly credited, either as an attribution or reference for any remixed content.
- Source Link: The user must include a link to transitionsproject.eu to direct learners to the original source.
- Branding: The Transitions project logo must be displayed either on the slides or in the credits.
- ShareAlike — If you remix, transform, or build upon the material, you must distribute your contributions under the [same license](https://creativecommons.org/licenses/by-sa/4.0/) as the original.

About us

We are a University Research Lab engaged in service design, working on projects aimed at organizing people, infrastructures, product systems and common goods in terms of **sustainability** and **social inclusion**. We adopt an ecosystemic and integrated approach focused on stakeholder participation and engagement.

What are we addressing?

By the end of the year, the requirement of managing waste production will become a reality.

The ERP must be approved by the end of the year, meaning that every company will be required to organize its waste management, including through collective and collaborative systems, such as consortia and Re-HUB, that will handle the collection, sorting and preparation for reuse, recycling and recovery of waste materials

GOAL

Waste Journey Workshop

With this activity, we aim to map the current journey of waste and pre-consumption scraps, emphasizing any potential problems in terms of Technology, Regulatory/Normative matters or System/Process issues.

Our goal is to understand problems and needs, creating the conditions for a design approach focused on companies' needs and in line with the challenges set by European directives

Ice-Breaker Activity

DESIGN A NEW SCENARIO

How do you imagine the
journey towards
sustainable fashion?

How does the workshop work?

Waste Journey

Phase 1: Individual reflection

- We read the questions and answer them on post-its, placing them in the tool

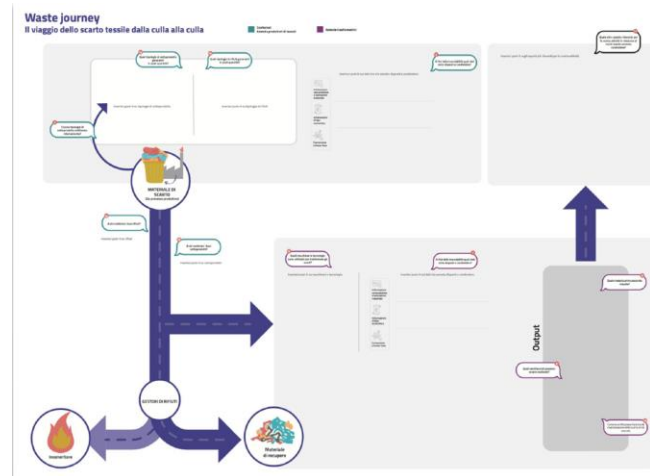

Phase 2: Discussion and identification of gaps

- We discuss to verify the results and identify possible gaps – difficulties that a company can encounter when achieving one or more objectives
- The gaps can be technological, system-related or related to legislation/policy

Phase 3: Reflection on the future

- In the following activities, the opportunities and suggestions emerged from the Waste Journey will be explored

Duration: 45 minutes
